International Patent Classification (IPC) or both national classification and IPC		<b>G01S5/14</b>
Applicant <b>SIRF TECHNOLOGY, INC.</b>		

This International Searching Authority hereby declares, according to Article 17(2)(a), that **no international search report will be established** on the international application for the reasons indicated below

1. ☐ The subject matter of the international application relates to:
  - a. ☐ scientific theories.
  - b. ☐ mathematical theories
  - c. ☐ plant varieties.
  - d. ☐ animal varieties.
  - e. ☐ essentially biological processes for the production of plants and animals, other than microbiological processes and the products of such processes.
  - f. ☐ schemes, rules or methods of doing business.
  - g. ☐ schemes, rules or methods of performing purely mental acts.
  - h. ☐ schemes, rules or methods of playing games.
  - i. ☐ methods for treatment of the human body by surgery or therapy.
  - j. ☐ methods for treatment of the animal body by surgery or therapy.
  - k. ☐ diagnostic methods practised on the human or animal body.
  - l. ☐ mere presentations of information.
  - m. ☐ computer programs for which this International Searching Authority is not equipped to search prior art.
  
2. ☒ The failure of the following parts of the international application to comply with prescribed requirements prevents a meaningful search from being carried out:
 

☐ the description
☐ the claims
☒ the drawings
  
3. ☐ The failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions prevents a meaningful search from being carried out:
 

☐ the written form has not been furnished or does not comply with the standard.  
☐ the computer readable form has not been furnished or does not comply with the standard.
  
4. Further comments:

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 203

Meaningful Search Could not be Carried Out (Art 17(2)(a)(ii) PCT)  
The claims and description fail to comply with the requirements of the PCT (in particular Art 5 PCT) to such a degree that it was not possible to carry out a meaningful search.

The application appears to have been filed without drawings.

"Detailed Description Of The Preferred Embodiments" (in particular, paragraphs 056 ff) purports to be a detailed explanation of the essential inventive concept of the application.

Constant reference is made to Figures 1 to 4 in the "Detailed Description Of the Preferred Embodiments". However, it does not appear possible to understand the essential teaching of the invention without the help of the Figures.

Hence, it is concluded that the application does not appear to comply with the conditions of Art. 5 PCT in that the invention is not disclosed in a sufficiently clear and complete manner for it to be carried out by the man skilled in the art.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
